GFI is a leading provider of Windows-based anti-virus, anti-spam, network security, network monitoring and messaging software. Founded in 1992, GFI has offices in the US, the UK, Germany, Cyprus, Romania, Australia and Malta, and sells its products through a worldwide network of resellers and distributors. GFI is a Microsoft Gold Certified Partner and has won the Microsoft Fusion (GEM) Packaged Application Partner of the Year award. Clients include Microsoft, Telstra, Time Warner Cable, Shell Oil Lubricants, NASA, DHL, Caterpillar, BMW, the US IRS, and the USAF. For further information about GFI and its products visit the links below:

GFIMailEssentials

Anti-spam for Exchange, anti-phishing and email management

GFI MailEssentials for Exchange/SMTP offers spam and phishing protection and email management at server level. GFI MailEssentials offers a fast set-up and a high spam detection rate using Bayesian analysis and other methods - no configuration required, very low false positives through its automatic whitelist, and the ability to automatically adapt to your email environment to constantly tune and improve spam detection. GFI MailEssentials also adds email management tools to your mail server: disclaimers, email archiving and monitoring, Internet mail reporting, list server, server-based auto replies and POP3 downloading.

GFIMailSecurity

Email anti-virus, content policies, exploit detection and anti-trojan

GFI MailSecurity for Exchange/SMTP is an email content policies, exploit detection, threats analysis and anti-virus solution that removes all types of email-borne threats before they can affect your email users. GFI MailSecurity's key features include multiple virus engines, to guarantee higher detection rate and faster response to new viruses; email content and attachment checking, to quarantine dangerous attachments and content; an exploit shield, to protect against present and future viruses based on exploits (e.g., Nimda, Bugbear); an HTML Sanitizer, to disable HTML scripts; a Trojan & Executable Scanner, to detect malicious executables; and more.

GFIMailArchiver

Email archiving of internal and external email

GFI MailArchiver for Exchange provides easy-to-use corporate email archiving, enabling you to archive all internal and external email into one or multiple databases, heavily reducing reliance on PST files. This allows you to provide users with easy, centralized access to past emails via a web-based search interface and the ability to quickly restore emails through a OneClick Restore process. GFI MailArchiver also aids you to meet the requirements of your email retention policy and helps you to fulfill regulatory email storage requirements such as the Sarbanes-Oxley Act. GFI MailArchiver for Exchange leverages the journaling feature of Exchange Server 2000/2003 and therefore provides unparalleled scalability and reliability at a competitive cost.

GFIFAXmaker

Network fax server for Exchange/SMTP

GFI FAXmaker for Exchange/SMTP is the leading network fax server. It integrates with Exchange Server, Lotus Notes and popular SMTP servers, allowing users to send and receive faxes and SMS/text messages directly from their email client. By leveraging your email infrastructure and Active Directory, GFI FAXmaker achieves unparalleled scalability, reliability and hassle-free administration. GFI FAXmaker has won the Windows IT Pro Magazine (formerly Windows & .NET) Readers' Choice Award for 3 years running.

GFILANguard

Network security scanner, port scanner and patch management

GFI LANguard Network Security Scanner (N.S.S.) checks your network for possible security vulnerabilities by scanning your entire network for missing security patches, service packs, open shares, open ports, unused user accounts and more. With this information (displayed in customizable reports), you can easily lock down your network against hackers. GFI LANguard N.S.S. can also remotely deploy missing patches and service packs in applications and OS. GFI LANguard N.S.S. is the leading Windows security scanner and very competitively priced.

GFIEventsManager

Network-wide event log management

GFI EventsManager is an easy to use events management solution that monitors, archives, processes and reports on events collected from various log types including Windows events, W3C and Syslog. It boasts the most advanced event processing and filtering rules in the industry and includes vast reporting capabilities which will decipher the complex activity logs from servers, routers, firewalls, active directory and more, presenting you with exactly the right information

you need to effectively monitor and manage your entire network.

GFIEndPointSecurity

Network-wide control of portable storage, media and consumer electronic devices

GFI EndPointSecurity offers you network-wide control of data flow via portable storage devices, allowing you to prevent users from taking confidential data or introducing viruses and Trojans to your network. GFI EndPointSecurity allows you to actively manage user access to media players (including iPod and Creative Zen), USB sticks, CompactFlash, memory cards, PDAs, Blackberries, mobile phones, CDs, floppies and more.

GFINetworkServerMonitor

Network monitoring

GFI Network Server Monitor automatically monitors your network and servers for failures and allows administrators to fix and identify issues before users report them. Alerts can be sent by email, pager or SMS. Actions, such as rebooting a machine, restarting a service or running a script, can be done automatically.

GFIWebMonitor

Real-time HTTP/FTP monitoring, anti-virus & access control

GFI WebMonitor is a utility for Microsoft ISA Server that allows you to monitor the sites users are browsing and what files they are downloading “ in REAL TIME. In addition it can block access to adult sites as well as performing anti-virus scanning on all downloads. GFI WebMonitor is the perfect solution to transparently exercise a degree of access control over users browsing habits and ensure legal compliance “ in a manner that will not alienate your network users!
